

Justin Kugler  
TAMS Class of 1999  
Distinguished Alumnus 2013

Justin works for the Center for the Advancement of Science in Space (CASIS), where he translates innovative space research proposals into actionable projects for the International Space Station National Laboratory. He has a B.S. in Aerospace Engineering from Texas A&M University, an M.S. in Mechanical Engineering from Rice University, and is working on an M.S. in Human Space Exploration Sciences at the University of Houston. While an intern for NASA Mission Operations Directorate, Justin was named a 1999 Goldwater Scholar for his study of orbital debris.

Justin has worked previously in research planning for the International Space Station Program, Crew Health System modeling for the Constellation Program, and as a weapons analyst for the Central Intelligence Agency. He volunteers at the George Observatory Challenger Center, serves on the Board of Directors of the Foundation for International Space Education, and is the AIAA Young Professionals Committee liaison to the Public Policy Committee. Justin also has written for the Houston Chronicle on politics and space issues and done media consulting and writing for TV and games.
