

## Summer Research (or early-research) Scholarship Agreement 2020

Please read the following section carefully. Your abiding by these regulations will facilitate receipt of the scholarship.

1. Accepting a TAMS Summer Research Scholarship requires full-time participation in the ten-week summer session (June 1-August 7). UNT-based Summer-Research-Scholarship holders must register and pay for at least one semester-credit-hour (preferably HNRS 3996) that reflects guided study or research within the department sponsoring your research. If your UNT research professor demands that you take three semester-credit hours within his/her department, then so be it. Either way, we request that you obtain the professor's approval to enroll for those hours on a Pass/Fail basis, as the summer-research experience is not about earning still one more "A"; at stake, rather, are the enchantment, discipline, and outcomes accompanying the adventure of research.
2. Students who receive a TAMS summer scholarship and who then drop out to take advantage of a different summer opportunity will be responsible, without the benefit of ongoing scholarship support, for whatever balance exists or is levied by the Departments of Housing, Dining Services, or by the Office of the Registrar.
3. To apply for this scholarship, students must have a cumulative semester average of at least 3.5 (higher GPAs preferred) as of January 1. Because GPA plays a significant role in the application process, students with the minimum GPA may be excluded from funding, given limited resources.
4. I understand that disciplinary points may disqualify me from summer-scholarship eligibility.
5. I agree to live in the assigned dorm (most likely McConnell Hall) and apply my summer-research scholarship toward room and board, along with summer-end room clean-up fees, if necessary.
6. Students must purchase a meal plan for the 10-week period.
7. The number of persons living in my dormitory room will not exceed that stipulated by UNT's division of housing. I must, further, obey all visitation rules.
8. The scholarship is for the 10-week summer session at UNT (June 1-August 7). Exceptions will be rare and will **not** include your wish to take advantage of U.S.-based or international family-travel plans, or other commitments falling short of either personal illness or unexpected family-member illness or (and we certainly hope that the following is not the case) for absence related to family bereavement. Stated otherwise, we will not consider petitions for family travel that have been scheduled months in advance, or for which airline tickets have been already purchased months or weeks before. Such visits are a commitment that you have already made and that necessarily trump the summer-research program.
9. That said, part of the application form will include the right of petition to be absent for a maximum of up to five consecutive days (including Saturday and Sunday) solely

for the purpose of attending an educational venue that stands to enhance your future studies—for example, an educational colloquium, a “college visit,” or an academic panel for which you are making plans at the time when you apply for the summer scholarship (absolutely not thereafter). Moreover, summer-research students will, by the date of application for the TAMS research program, be allowed to request an additional day off to take a college-entrance standardized test, for which, with the consent of their UNT PI, the student will be authorized to leave campus a day early. (Students wishing to take still another standardized test may do so if it falls on the closed weekend (including a Friday) of their own choosing. (Please see below for that provision.) In any of these scenarios, students will be obliged to have their parents return them to campus by curfew, on the final day of the longer program, or on the day of the exam, or by Sunday evening if the exam date leads into a self-chosen closed weekend. There will be no allowance, after the application period, for leave time that simply “springs up” because of unanticipated opportunities or exams, or because of opportunities for which you have applied, have not yet finalized, and for which you have not entered a petition at the time of application for the TAMS Summer Research Program. **All such enhancement requests must occur in a petition that accompanies the application for the TAMS Summer Scholarship.** Nor may students appeal for additional days by claiming that they will not use the five full days or the day-before provision of the standardized testing, or because the second standardized exam falls on a day other than a Friday. Standardized tests have several calendar options, whereas enrichment programs usually do not. Moreover, all absence must be approved by both the faculty research mentor and by the Associate Dean for Research—and not by Hall Directors or other staff members. The mentor’s approval does not override the disposition of the scholarship sponsor (that is, of the TAMS administration).

10. Students will not be allowed to petition for at-home residence to assume extensive oversight responsibilities for family members. While we regret the possible need for such commitment, it is inconsistent with the on-campus commitment we expect of students, relative to laboratory presence and participation in the social community of young researchers.
11. Students whose parents drive them home for medical visits must see a physician and must bring an M.D.’s note on return. The emphasis is on M.D. or an assigned P.A., and not on any other health-professions personnel.
12. You will work 35-40 hours per week for ten consecutive weeks on the research project, or longer if the PI deems weekend work requisite to the needs of his/her lab. Saturdays and some Sundays will feature beyond-the-lab colloquia, with requisite reading assignments and mandatory attendance.
13. You understand that the purpose of this scholarship is to accrue mentored experience in a UNT laboratory/research setting, or in a research setting at a different university.

14. **You must register (pass/fail) and pay for a Special Problems course** (preferably HNRS 3996 – one semester credit hour, P/F). (Check with your on campus mentor for the exact course number of course hours, and the departmental course-section number, if your research mentor wishes for you to register for a course in his/her department. (That PI has the right to have you register for up to three hours, in a specified course or otherwise. There is a significant increase in cost for a 3-hour course, but TAMS recognizes the PI's right to make this request. We are not in a position to raise the amount of your award.)
15. **Students who choose to withdraw from the program (see item 2, above) are themselves responsible for withdrawing from their registered P/F or graded course. TAMS is not responsible for withdrawing you from that course. The monetary balance accrued, should you withdraw after the allowable “drop” period, will be your responsibility to pay. You may also receive a grade of “F” if you fail to take the initiative of dropping the course.**
16. Students who, in the previous year, were accepted into, and then withdrew from, the Early-Research Summer Scholarship Program (for reasons other than health) are ineligible to apply for a TAMS Summer Research Scholarship.
17. The TAMS administration reserves the right to terminate the Summer Research Scholarship if the student's PI reports a pattern of underperformance or the failure, on the part of the TAMS student, to live up to lab expectations.
18. Students whose PI's are in a position to pay them for their research must report that advantage to TAMS, so that an appropriate adjustment in their TAMS Summer Scholarship may come under consideration.
19. Students who earn Summer Research Scholarships must carry health insurance, either through their family, or through the family's independent purchase of insurance for the student.
20. There will be no research-mentor hopping. To receive the scholarship, you must work exclusively in the lab of the research mentor with whom you entered into covenant as part of the scholarship application process. There will be no “dropping” one professor, picking up another, and retaining the scholarship. Nor may you work in two labs concurrently, if you hold a TAMS Summer Scholarship, or reside off campus. All Summer Research Scholarship recipients must reside on campus, even if your parents are willing to drop you off and pick you up at day's end.
21. In a manner consistent with TAMS protocol, there will be two closed weekends during which students may travel home with a parent, or with a parent-delegated driver. The parent must personally return the student to campus by the stipulated curfew hour on Sunday—not Monday morning. One of those weekends will be the 4<sup>th</sup> of July weekend, with parents picking up students after noon, on July 3, if the research mentor grants approval for the student to work for only half a day that Friday. The other closed weekend will be of the student's choosing (with the permission of the PI) and may include a weekend on which a standardized test will occur. If that is the case, the student may return to campus by curfew on Sunday evening rather than on the day of the exam.
22. Students may not drive themselves to or from campus; may not have an automobile on campus during the period of the TAMS Summer Research Fellowship, and may not accept automobile rides from anybody other than a parent, a university official, or

- a driver over the age of 25 assigned by the parent in writing to the TAMS administration. Parents and students will sign out, and then back in, on such weekends.
23. Nor will any Summer Scholarship Recipient use Uber or related modes of transport. Students who choose to go off campus at any time must sign out in designated front-desk booklets, must enter cell-phone information, destination information, and must, upon return, sign back in. Stated otherwise, we must always know where you are and how to reach you. All students who leave campus (even crossing Hickory Street to eat at a restaurant or purchase something at CVS, must do so with another TAMS student, with both signing out for that excursion.
  24. Students traveling on a daily or occasional basis to Discovery Park must take the UNT Yellow Line bus. Check schedules at <http://transportation.unt.edu/transit>. These students must sign out at the front desk—but without an accompanying “buddy.”
  25. All students must abide by curfew hours and be prepared either for a roll-call check or for an RA room-check.
  26. TAMS students, while being courteous to younger “Summer Institute,” or related students, will not fraternize with them.
  27. **Summer researchers may not enroll in any other courses or make any commitments to other functions (including part-time or full-time jobs) while undertaking summer research. Doing so will nullify the scholarship and leave the student liable for all housing and dining room expenses accrued to date.**
  28. Summer researchers will receive an appropriate grade for their work when the project is complete--preferably a "P," unless your research mentor demands that you enroll for a grade.
  29. By July 31, or earlier, students will submit, electronically, to [Valerie.Adell@unt.edu](mailto:Valerie.Adell@unt.edu), a PDF of the prospective poster-presentation that they will present on Scholars Day, in April 2021. You may revise and update these posters throughout the 2020-2021 academic year, in accord with ongoing research. Nonetheless, the poster slide you submit at the end of July, should comply with criteria for 2021 Scholars Day exhibition (early April) that you are obliged to present. You will receive the PDF templates after you earn a TAMS Summer Research Scholarship.
  30. Students will ask their professors either to grant or deny permission to have a poster displayed on a TAMS website, should we decide to initiate an exhibit. (This is out of consideration to intellectual-property rights.)
  31. Students understand that they must display their poster on Scholars Day (in April). We also encourage students to apply their research toward Regeneron and Goldwater applications, if students meet the criteria for either or both of those competitions. TAMS students too frequently fail to apply for Regeneron competition because they have other priorities. We feel that such failure to champion TAMS research and its outcomes ill serves our community. In today’s parlance, we expect you to “give back,” intellectually.
  32. You understand that the \$4,000 scholarship will arrive in installments. Each installment is contingent upon excellent progress as assessed by the mentor.
  33. By July 6, you must submit (to [Valerie.Adell@unt.edu](mailto:Valerie.Adell@unt.edu)) a professor-approved 150-200-word, single-spaced description of your summer research, and of its outcomes-to-date. You must compose that summary in such manner as to provide the generalist

- with reasonable understanding of, and appreciation for, your research and contributions to the field of science.
34. Students understand that if, before or during the scholarship period, they leave the program or TAMS for any reason, then the scholarship will be withdrawn, with the student's being responsible for accrued charges, if any, to date.
  35. It is your responsibility to check IRS responsibility relative to the TAMS Summer Research Scholarship.
  36. As representatives of the Texas Academy of Mathematics and Science, students must be punctual, respectful and compliant at all times, whether in a laboratory or dormitory setting, as their conduct reflects on the Academy. To that end, students agree to abide by all curfew rules, sign-out rules, and travel-to-and-from-home rules, as specified elsewhere in the application literature. They will also be held responsible for online demeanor at odds with the comportment values of TAMS or of UNT students generally. Students must also abide by all University and TAMS rules, regulations, and policies. Any violations, including alcohol, marijuana, or "street-drug" consumption, etc.—including one's being in the company of those so engaged—will result in summer-session and/or general TAMS dismissal, and with your having to reimburse the full value of the scholarship—not to mention punitive action by the UNT Dean of Students' Office or by local law enforcement.
  37. Failure to complete any aspect of the scholarship requirements may result in cancellation of the scholarship and may result in a grade of F for the summer session. In such cases, students will be responsible for any financial balances accrued to date.

**Your receiving this scholarship will be contingent upon review of all of your application materials and upon your uploading a signed PDF of this document as part of the application process. Kindly print this form, fill in the information, and return a PDF to [Valerie.Adell@unt.edu](mailto:Valerie.Adell@unt.edu) Please sign legibly in dark ink.**
