Note: Times are estimates based on past experience and are subject to traffic, weather, etc. Anticipated times may be adjusted as the year progresses, will be communicated prior to each individual trip and will be updated when students are en route.

- There are 44 families in the Houston Metro Area with students going to TAMS next year. Two of those are further north, around the Huntsville area. TAMS students living in other areas along the general route are welcome to participate in the bus service as well, though stops will be optimized to best serve the needs of the families who participate. The densest area of students appears to be the Katy and Sugar Land area. We are hopeful that most families will wish to participate in the bus service.
- Traditionally, the bus stops in Madisonville (Buc-ee's) to allow students to get something to eat, use the bathroom, and allow the driver a chance for a break. We understand Huntsville area students typically use this stop.

- Historically, there has been three stops in the Houston area making general use of 99/Grand Parkway as a primary route:
 - North – Springwoods Village Hospital @ 2255 E. Mossy Oaks Road Spring, Texas
 - Katy – Park-n-Ride (Katy and Grand Parkway) @ 1030 N Grand Parkway, Katy, TX.
 - Sugar Land – Park-n-Ride @ 11415 Roark Road Houston, TX.

- Currently, it looks like all stops make sense to continue. The principle of stop selection is to minimize the drive time for the greatest number of families. If you need add another stop, we will do our best to incorporate it. We have less families this year. We want to do our best to win your participation.
